From John's Desk:

- August was all over the place in the weather department. Mostly hot and dry. It only rained 2 days of the month about 6 tenths each time. With the hot winds blowing it didn't last long. We've been running the pivots constantly for the whole month on our sorghum crop. The sorghum looks good with some excellent, but has taken a lot of water and fertilizer.
- Visitors tell us that the heifers look very good. We also like the condition on the heifers and think that they are about right going into fall and winter. The almanac is calling for a wetter winter and the pens should be in good shape for it. The days and nights are cooling off some and the heifers seem to be enjoying it.

From Justin's Desk:

- Last month we received a little over 2000 heifers and shipped out around 1800. Our total head count continues to remain about the same. We just finished construction on our last couple pens. We are planning to start our sorghum harvest in the next couple of weeks weather permitting. It looks like we should get really good yields on the sorghum.
