From John's Desk:

- It finally rained. We received 3.5 inches and it was well received. It came in just the nick of time for my sorghum crop. Fall harvest of corn and sorghum has begun.
- We have experienced a change in weather and temperatures lately. Cooler nights and warm days have increased the amount of respiratory cases we have been seeing. We have changed our arrival processing to aid in the transition from your facility to mine.

From Justin's Desk:

- We continue to be pleased with the condition of the heifers. The weight of the heifer's going out has remained consistent. We have begun construction on the new part of the yard.
- We have finished the first harvest of our Milo silage. In two to three weeks we will cut the rest of the sorghum crop. We are happy with the yields and quality of the silage thus far.

From Debbie's Desk:

- We wish to recognize Teresa Orr for her hard work in designing the Arroyo Seco Website. If you wish to visit the website here is the address:
